

iVendLocker

Locker-Based Industrial Vending Solutions

Unlock the power of **efficient inventory distribution with iVendLocker**, a state-of-the-art locker-based industrial vending solution. This innovative system **accelerates inventory and asset distribution**, minimising downtime, and boosting operational productivity.

iVendLocker is a locker based industrial vending solution that speeds up the process of distributing your inventory and assets.

iVendLocker offers fully integrated reporting and real-time management through Sourcerer, our cloud based software platform.

Benefits of iVendLocker

Easy to use

- Touchscreen selection and secure issuance by user effectively tracking where an item was used and who used it.

Traceability

- Tools and products are securely stored, with user defined access. Assets can be checked in/out by serial number utilising barcodes or NFC tags.

Expandability

- iVendLockers can simply connect to each other to create an expandable bay of cabinets to dispense all of the products you require.
- Users are only able to access items where permissions are granted, allowing complete control and accountability to a single product.

Cost reduction

- Minimises stockouts and associated production downtime through automated reordering.
- Reduces employee walk and wait time by storing items at strategic point of use locations.

Efficiency

- Records all transactional data for automated charge capture and reordering.
- SmartSearch for any item at both company and site level.

Flexibility

- iVendLocker can be customised by size and shape depending on requirements and space.
- Power tools can be put on charge while being stored.

Feature Rich iVendLocker Solution

- Access with a card or PIN number.
- Technical pdf's can be displayed.
- Job number enabled.
- Multi Supplier enabled.
- POU availability 24/7.
- Images of product displayed on screen.
- Option for ethernet, Wi-Fi or 3/4G.
- Door Configuration: 3-60 doors depending on numbers of rows/columns.
- Individual lockers can be fitted with both power points and data ports.
- UPS can be fitted to mitigate power failures.
- Overall Dimensions: 1870mm(H), 1033mm(W), 500mm(D).
- Row Configuration: 1-12 rows.
- Column Configuration: 3-5 columns.
- Runs off a standard 110/230v power supply.

Why Choose iVendLocker?

iVendLocker provides a scalable and cost-effective solution for the secure management and control of a wide range of products and assets.

iVendLocker is the ideal solution to transform time-consuming manual tasks into automated processes and saves on employee walk and wait time.
