

iVendSecure

Experience a new level of control with **iVendSecure**, your partner in secure industrial inventory management.

iVendSecure manages and controls inventory and assets effectively.

iVendSecure is a secure industrial vending solution that enables customers to effectively manage and control their inventory and assets.

iVendSecure gives you 24/7 Point of Use availability of products for specified users.

iVendSecure can hold up to 936 individual products in a secure carousel solution.

Benefits of iVendSecure

Easy to use

- Easy navigation using the touchscreen. Product images on the screen with name and description making it easy to choose the right product.
- Simple configuration.

Traceability

- Allows management to know who, when, where and why, with job number control, for the usage of any item. It has the capability to provide full batch traceability and control over inventory issuance.

Cost reduction

- Reduces consumption of MRO, consumables and tooling by up to 40%.
- Minimises stockouts and associated production downtime through automated reordering.
- Reduces employee walk and wait time by storing items at strategic point of use locations.

Flexibility

- iVendSecure comes in numerous door sizes to accommodate varying inventory.
- iVendSecure can also be reconfigured in the field to meet changes in scopes of demand and usage.
- Manages consumables, critical spares and assets at Point of Use.

Efficiency

- Multiple items can be selected via the shopping basket on the Touchscreen, which are dispensed sequentially using pick by light.
- Restock by light and on-screen image reference makes replenishment easy and accurate.
- Records all transaction data for automated charge capture and reordering.
- Cloud based, manages multiple solutions using one platform across multiple sites.
- SmartSearch for any item at both company and site level.

Security

- Secure storage: iVendSecure is available in 4 door size variations providing between 18 and 936 secure compartments in a single unit.
- Users are only able to access items where permissions are granted, allowing complete control and accountability to a single product.
- Usage can be controlled through rationing products available to users.

Expandability

- An iVendSecure primary can have multiple iVendSecures or iVendlockers as secondary machines.

Feature Rich Secure Vending Machine

- Access with a card or PIN number.
- Technical pdf's can be displayed.
- Job number enabled.
- Multi Supplier enabled.
- POU availability 24/7.
- Images of product displayed on screen.
- Option for ethernet, Wi-Fi or 3/4G.
- Runs off a standard 110/230v power supply.
- UPS can be fitted to mitigate power failures.

Why Choose iVendSecure?

The iVendSecure controls consumption, reduces stock outs and saves on employee walk and wait time.

iVendSecure provides a scalable and cost-effective solution for the secure management of a wide range of high and low usage items such as PPE, MRO, consumables and assets. The high-capacity rotary format provides a very economical cost per location solution.
